

# REMEDIAL SITE ASSESSMENT DECISION – EPA Region 08

**Site Name:** 900 S 200 W SOLVENTS

**Alias(es):**

**City:** SALT LAKE CITY

**County or Parish:** SALT LAKE

**State:** UT

**Refer to Report Dated:** 05/18/2021

**EPA ID:** UTN000821040

**Report Developed By:** STATE

**State ID:**

**Report Type:** Preliminary Assessment #001

**Decision Date:** 05/18/2021

☐ 1. Further Remedial Site Assessment Under CERCLA (Superfund) is not required because:

☒ 2. Further Assessment Needed Under CERCLA.

Higher priority for further assessment

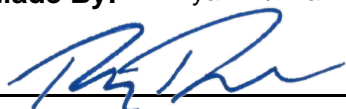

☐ 3. Remedial study/cleanup needed.

## Decision/Rationale:

Chlorinated solvent plume located in a mixed-use commercial/residential area of Salt Lake City, Utah. The contamination was first discovered in the 1990s and is believed to be associated with a former dry-cleaning facility. Two leaking underground storage tanks were removed from the property and subsequent investigations revealed impacts to soil and groundwater. According to Preliminary Assessment, dated May 18, 2021, the Utah Division of Waste Management and Radiation Control are working with the property owner to address the contamination inside the property boundary. Additional investigation is needed to evaluate off-site migration and potential human health exposures.
